DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 3, 5, 8 (in part), 9 (in part), 10 (in part), 14 (in part), 18 (in part), and 19, drawn to a method of determining whether an offspring of an individual afflicted with tumor suppressor gene disease has an increased risk of developing tumor suppressor gene disease, classified in class 435, subclass 6.
- II. Claims 4, 8 (in part), 9 (in part), 10 (in part), and 14 (in part), drawn to a method of identifying allele which is lost in tumor, classified in class 435, subclass 91.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, Invention I is drawn to a method which involves the comparison of the microsatellite markers of a parent and those of the offspring to determine whether the offspring comprising the same markers has an increased risk of developing the cancer which is afflicted in the parent. Invention II, however, is drawn to a method which identifies whether a particular microsatellite marker is deleted in a tumor of an individual and does not require the determination in an offspring. A method involving the determination of microsatellite markers in a patient can be employed in cancer detection assay, wherein the method is separately useful, without whether the markers are inherited to his/her offspring.

Art Unit: 1637

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
